Summer Term 2019

Dear Parents/ Carers

We warmly welcome you back after the Easter break and look forward to sharing our final term with lots of fun with you and your little ones.

We are always so excited when we get to the summer term learning because the children begin to put all the knowledge they have gained on their journey so far into practice with such confidence and enthusiasm.

Our learning will continue to cover all aspects of the curriculum along with developing life skills such as, communication and friendship, team building, a sense of belonging, giving them lots of valuable practical skills and above all an appreciation and understanding of our natural world.

Foundation will be frequently exploring Newlyn beach, the Millenium woods, Penlee Park and our school nature garden. We will be visiting Tanglewood gardens in Newmill and the Blue Reef Aquarium in Newquay, (more details to come nearer the time for these two trips).

We would welcome as much help as possible to cover our offsite learning, we will put up a poster for anyone interested in signing up.

Your child will need a sun hat and sun cream to be left at school every day now to keep them protected from the sun as we will be predominantly outdoors this term. Also a light rain coat would be very useful for unpredictable weather.

Many thanks

Mrs B Gribben
